

# PIPE PAL 2

**CONTROL UNIT  
for SEESNAKE  
CAMERA REELS**

**with TEXT WRITER  
BATTERY POWER and  
DIGITAL VIDEO RECORDER**

# PIPE PAL 2

## THE FEATURES YOU NEED FOR EFFICIENT PRODUCTIVITY

### ✓ FULL FEATURED TEXT WRITING

- Pipe Pal 2 enables professional and informative video clips. You can use pre-saved forms and header pages, quickly type and edit pages of text on the waterproof computer style keyboard and store up to ten pages of text.
- There are seven display styles for highly legible and customised appearance.
- On-screen help ensures easy use with minimal familiarisation required.

### ✓ DIGITAL VIDEO RECORD / REPLAY

- Pipe Pal 2 records onto USB flash drives, giving high quality, inexpensive and reliable recordings.
- The built in switchable microphone with noise gate and automatic level control lets you record a narration while you perform a survey.
- Replay your recordings on the LCD monitor, for total confidence in the quality of your work.
- Pipe Pal 2 has large front panel buttons for record start and stop, plus controls for camera light level and Sonde operation.

### ✓ FAST, SIMPLE, EFFECTIVE

- USB flash drives are used to store your recordings on Pipe Pal 2. They are more robust than DVD or hard drive recorders as they have no moving parts. They are also more convenient and faster, as you do not need to finalise, as with DVDs, or transfer, as with hard drives. A few seconds after stopping a recording, the drive can be removed and presented to a customer.
- For more information on work-flow options, please visit our web site.
- Pipe Pal 2 includes software for easy creation of DVDs on a PC.
- You can connect an external camera to Pipe Pal 2, and the output sockets on the front panel enable connection to external equipment.

### ✓ BATTERY OR MAINS POWERED

- Pipe Pal 2 has internal batteries with sufficient capacity for a full day's work and they are easily charged overnight.
- You need never worry about generators or finding mains power sources again.
- Using mains power (when available) charges the batteries whilst you work.

### ✓ STURDY, PORTABLE, VERSATILE

- Pipe Pal 2 is housed in a metal framed equipment case, built to withstand the rigours of daily use.
- The case stands three ways for easy horizontal, angled or vertical viewing.
- The LCD monitor is deeply recessed to shade it for outdoor viewing.
- Pipe Pal 2 will work with any Compact, Mini or Standard SeeSnake camera reel, either PAL or NTSC format, and the supplied PC software allows recording of PAL or NTSC DVDs from either camera format.

### ✓ PIPE PAL 2 IS DESIGNED, MANUFACTURED AND SUPPORTED IN NEW ZEALAND BY VIDEO ENGINEERING 1996 Ltd.
